HIGHLIGHTS California's seasonally adjusted unemployment rate for September was 5.9 percent, up from the 5.4 percent in August. A year ago, in September, the rate was 5.1 percent. During September in California, seasonally adjusted employment decreased by 263,000 over the month while unemployment increased by 63,000. The number of job losers increased from 364,800 in August to 427,400 in September. The number of job leavers increased by 39,000 during the month. The national civilian seasonally adjusted unemployment rate for September was 5.7 percent, up from the 5.6 percent in August.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 98,900 from 12,755,900 in August to 12,854,800 in September. The largest increase in employment was in the government sector with a gain of 83,700 jobs, most of which occurred with the reopening of schools. Other sectors that registered increases were services with 17,100 additional jobs; trade with 5,900; and transportation and public utilities with 2,000. After adjusting September's data for seasonality, employment grew in four of the eight major nonagricultural sectors. The largest decrease in jobs occurred in construction with 6,400, followed closely by manufacturing with 5,500, and government with 5,100. Job losses in the manufacturing sector were spread throughout most of the components in durable goods; this marks the sixth consecutive month that seasonally adjusted employment in manufacturing has decreased. Since September 1989, total wage and salary employment, not seasonally adjusted, has increased by 263,600, a gain of 2.1 percent over the year. During August, average weekly earnings and average weekly hours worked in manufacturing increased to $467 and 40.6, respectively.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 826880, Sacramento, CA 94280-0001.

* The three-month moving average data for September in Table 2 have been revised.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.
